

Execute and display the results for the following commands in Kali Linux Operating Systems:

- i) Ls
- ii) Cat
- iii) Mkdir

Aim

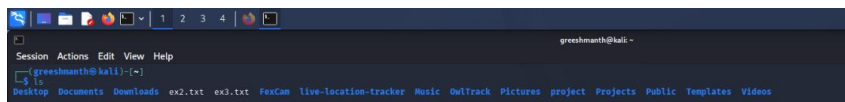

To execute and display the results of basic Linux commands such as ls, cat, and mkdir in the Kali Linux operating system.

1) ls Command

Meaning: The ls command is used to list files and directories in the current directory.

Command:

ls

2) cat Command

Meaning: The cat command is used to create, display, and combine file contents.

Command:

First, create a file and enter some text:

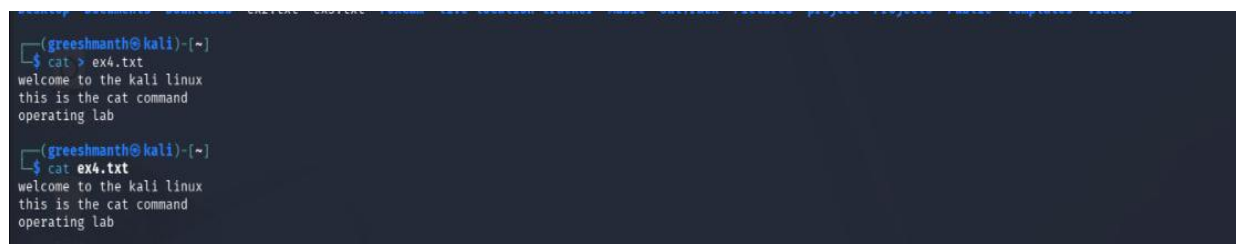

cat > sample.txt

enter the plain text

To display the file contents, execute:

cat sample.txt

output:

3) mkdir Command

Meaning: The mkdir command is used to create a new directory.

Command:

mkdir EthicalHacking

To verify that the directory was created, execute:

ls

Output:

```
(greeshmath@kali)~$ mkdir ex4
(greeshmath@kali)~$ ls
Desktop  Documents  Downloads  ex2.txt  ex3.txt  ex4  ex4.txt  FoxCam  live-location-tracker  Music  OwlTrack  Pictures  project  Projects  Public  Templates  Videos
(greeshmath@kali)~$
```

Result:

Thus, the ls, cat, and mkdir commands were successfully executed in the Kali Linux operating system, and their results were displayed.
