

3. Execute and display the results for the following commands in Kali Linux Operating Systems:

1. Tree
2. Head
3. Tail

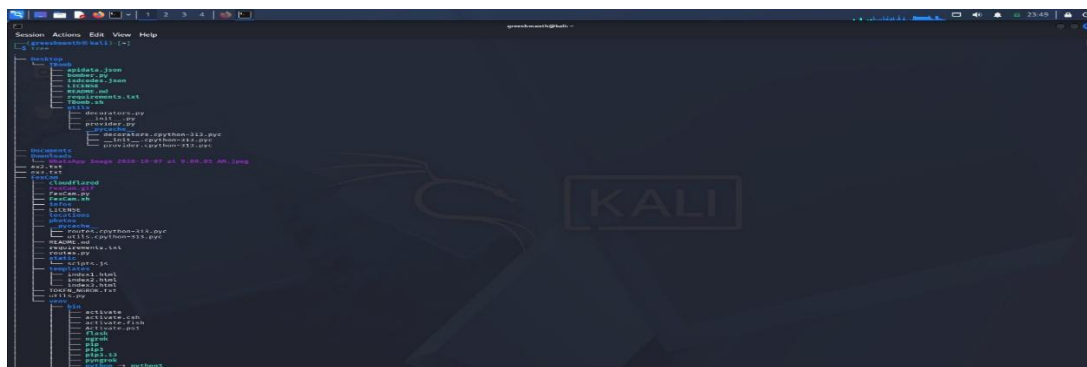

Aim

To execute and display the results of basic Linux commands such as tree, head, and tail in the Kali Linux operating system.

1) Tree Command

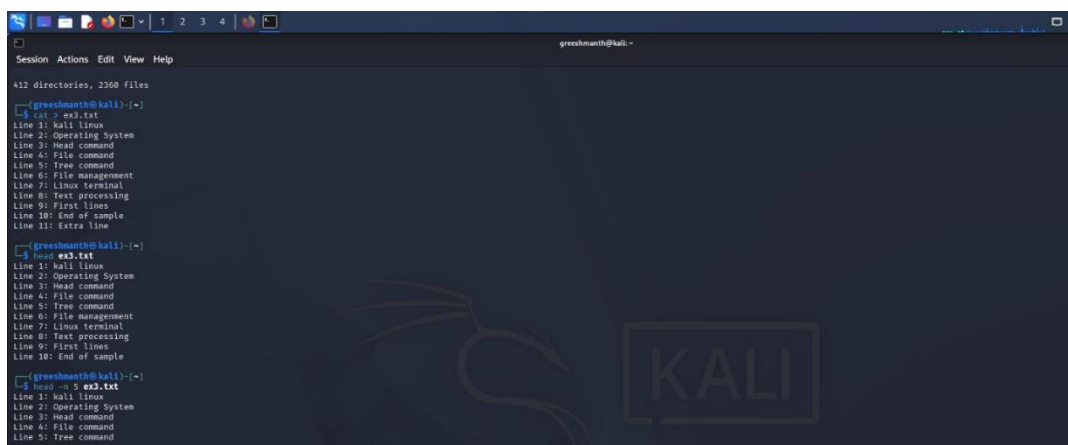

Meaning: The tree command is used to display the directory and file structure in a tree-like format.

Output:

2) Head Command

Meaning: The head command is used to display the first 10 lines of a file by default.

3) Tail Command

Meaning: The tail command is used to display the last 10 lines of a file by default.

```
root@kali:~# tail ex3.txt
line 2: Operating System
line 3: Head command
line 4: File command
line 5: Free command
line 6: File management
line 7: Linux terminal
line 8: Text processing
line 9: First lines
line 10: End of sample
line 11: Extra line

root@kali:~# tail -n 5 ex3.txt
line 7: Linux terminal
line 8: Text processing
line 9: First lines
line 10: End of sample
line 11: Extra line

root@kali:~#
```

Result:

Thus, the tree, head, and tail commands were executed in the Kali Linux operating system, and their results were displayed.
