

2. Execute and display the results for the following commands in Kali Linux Operating Systems:

less command

more command

vi command

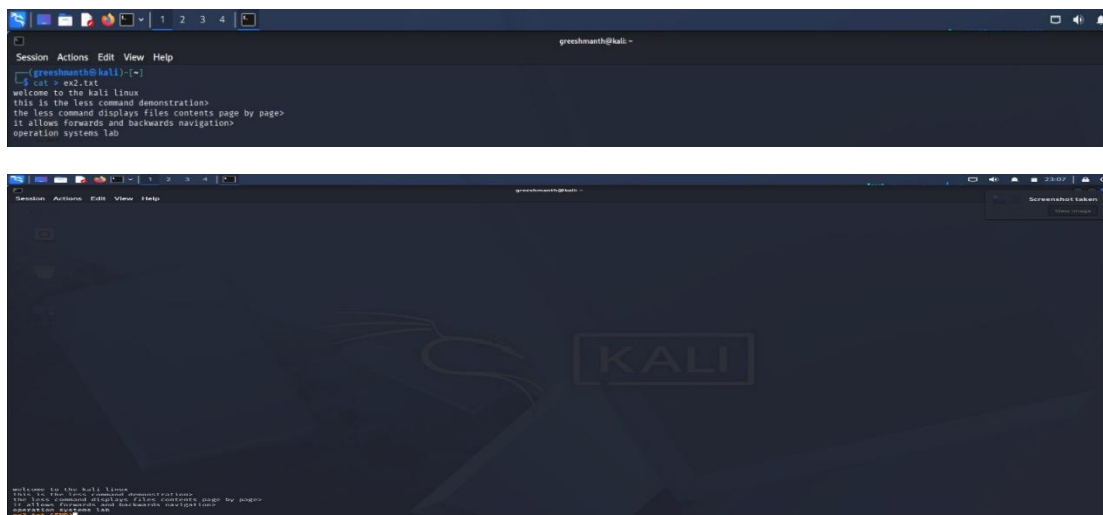

Aim

To execute and display the results of basic Linux commands such as less, more, and vi in the Kali Linux operating system.

1) less Command

Meaning: The less command is used to view the contents of a file one page at a time. It allows the user to move forward and backward through the file.

Output:

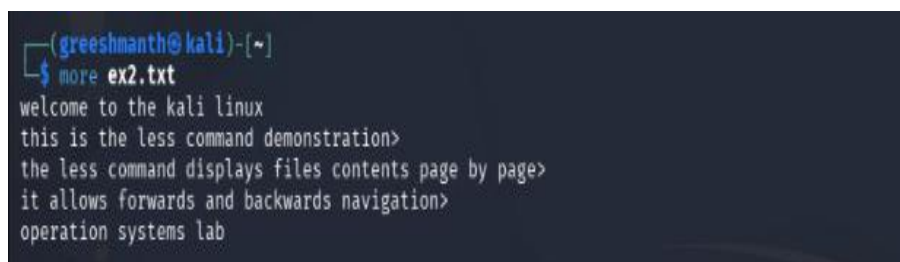

```
(greeshmanth@kali)~$ cat > ex2.txt
welcome to the kali linux
this is the less command demonstration>
the less command displays files contents page by page>
it allows forwards and backwards navigation>
operation systems lab

(greeshmanth@kali)~$ less ex2.txt
welcome to the kali linux
this is the less command demonstration>
the less command displays files contents page by page>
it allows forwards and backwards navigation>
operation systems lab
```

2) more Command

Meaning: The more command is used to display the contents of a file one screen at a time. It is useful for reading long files.

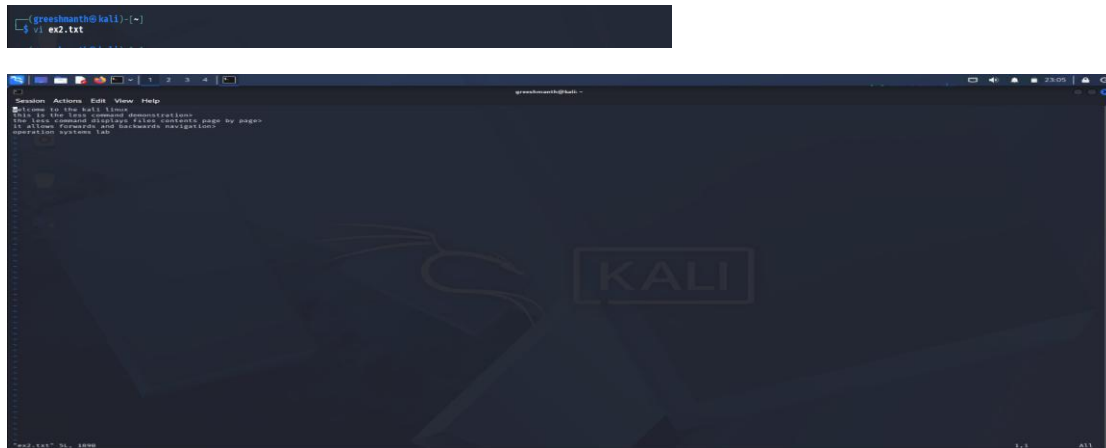

Output:

```
(greeshmanth@kali)~$ more ex2.txt
welcome to the kali linux
this is the less command demonstration>
the less command displays files contents page by page>
it allows forwards and backwards navigation>
operation systems lab
```

3) vi Command

Meaning: The vi command is a text editor used to create, edit, and save text files in Linux.

Steps to execute:

1. Type i to enter Insert mode.
2. Enter the text.
3. Press Esc to exit Insert mode.
- 4. Type :wq and press Enter to save and exit.**

Result:

Thus, the less, more, and vi commands were successfully executed in the Kali Linux operating system, and their results were displayed.
