

Ex 1

Execute and display the results for the following commands in Kali Linux Operating Systems:

rm command

users command

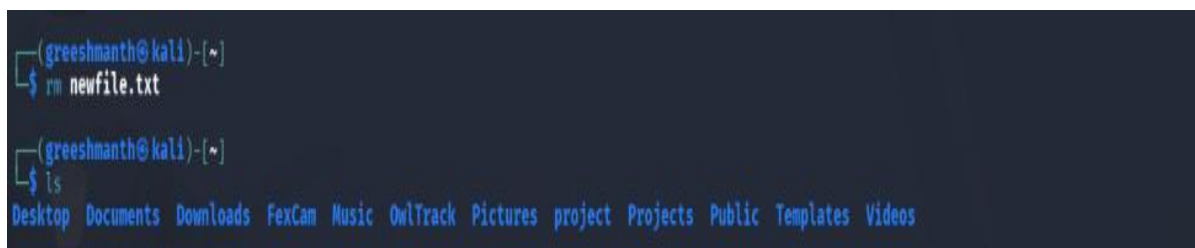

tree command

Aim

To execute and display the results of basic Linux commands such as rm, users, and tree in the Kali Linux operating system.

1) rm Command

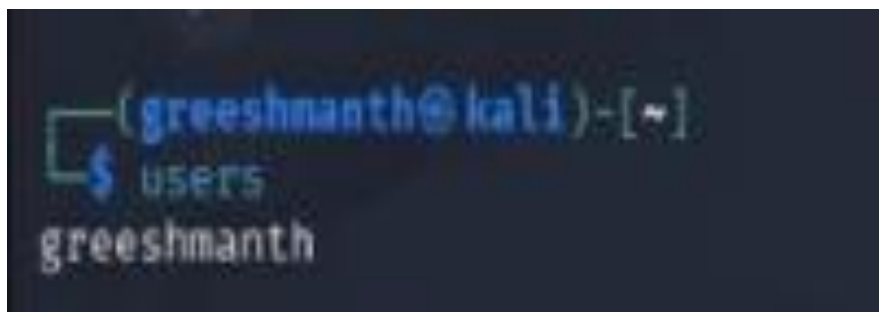

Meaning: Remove files or directories.

```
(greeshmanth@kali)-[~]  
$ rm newfile.txt  
  
(greeshmanth@kali)-[~]  
$ ls  
Desktop Documents Downloads FexCam Music OwlTrack Pictures project Projects Public Templates Videos
```

2) users Command

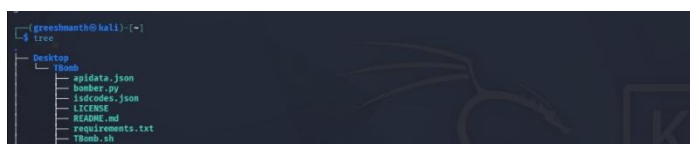

Meaning: Shows the usernames of users currently logged into the system.

```
(greeshmanth@kali)-[~]  
$ users  
greeshmanth
```

3) tree Command

Meaning: Displays the directory structure in a tree format.

```
(greeshmanth@kali)-[~]  
$ tree  
tree  
├── Desktop  
│   ├── thumb  
│   ├── apidata.json  
│   ├── bomber.py  
│   ├── isccodes.json  
│   ├── LICENSE  
│   ├── README.md  
│   ├── requirements.txt  
│   ├── thumb.sh  
│   └── ...  
└── ...
```

sResult

Thus, the rm, users, and tree commands were successfully executed in Kali Linux and their results were displayed.
